 It is good to purge & let blood,
 for in this Month the Humours
 and Blood increase, and gross
 feeding breeds gross Blood and
 Humours; therefore use Meats
 of good digestion, and such as
 afford good Juice & Nutriment
 to the Body. Forbear all things
 of salt, purge the Blood by Poti-
 ons and Blood-letting. Sweet
 Meats and Drinks are commen-
 dable. Be sure to eat in the
 Morning before you drink.

 Beware of violent heat, and

Beware of Physick and Blood-
letting in the Dog-days, if the
Air be hot; otherwise, if occa-
sion require, you may safely
make use thereof. Now mode-
rate Diet is best. Beware of Sur-
feits Heats and Colds, for Pleu-

not to sleep much, especially in
the afternoon, for that brings
oppilations, headach, agues, and
Catharrs, and all notorious Di-
stempers of the same kind. Red
Wine and Claret are excellent

A Description of the four Quarters of the Year.

THe *Spring Quarter* begins this Year upon Saturday *March* the 10th, at 3 in the morning, at which time the *Sun* enters the *Equinoctial Sign Aries*, causing an equality of Day and Night all the habitable World over. *Summer* takes beginning Monday *June* the 11th, about 5 in the morning, the *Sun* then approacheth our *Zenith*, and enters the first Scapule of our *Tropical Sign Cancer*, making the longest Days with us, and the shortest Nights. *Autumn*, or *Harvest Quarter*, begins when the *Sun* touches the first Scapule of the *Equinoctial Sign Libra*, which this Year will be Thursday *Sept.* 11th, near 8 at night, again equalizing both Day and Night. *Winter* begins Tuesday *Decemb.* 11th, near 8 in the morning, making the shortest Day and longest Night in the Year on this side the *Equator*: As also the longest Day and shortest Night to them who inhabit the *Southern* part of the World.

Of Eclipses that happen this Year 1694.

THere will be no less than four Eclipses this Year, two of the *Sun*, and as many of the *Moon*, and only two will be visible with us: The first will be upon New-year-day, an Eclipse of the *Moon*, much about Noon, and therefore not to be with us. The second will be a Solar defect, *June* the 12th, about 5 at night, and may be seen if the Air be clear. The third will be an Eclipse of the *Moon*, *June* 26, about midnight, and may be seen by those that will observe it. The fourth is a fourth Eclipse of the *Sun*, *Decemb.* the 6th, near 5 at night, but not to be seen in our Hemisphere.
